Dowsing is a powerful way to obtain answers to your questions as well as access information for healing purposes. The pendulum, dowsing rods or bobbars are all tools that have been used for centuries to pierce the veil of the unknown. Today, they are used to find underground water, negative energy lay lines, in archaeology sites and by health practitioners to measure the energy field and remove blockages, among other uses.

At the completion of this course, you will have the core skills and develop sufficient confidence to use the pendulum and bobber to get answers to your questions as well as perform core energy clearings on yourself and your family and friends. Participants who complete the training will receive participation certificates. This is the first two parts of a three-part certification series and an advanced course/apprenticeship will be offered.
